

Warehouse Management Systems (WMS)

Efficient control of your entire warehouse operation

Warehouse management is becoming increasingly challenging, particularly for large businesses and enterprises:

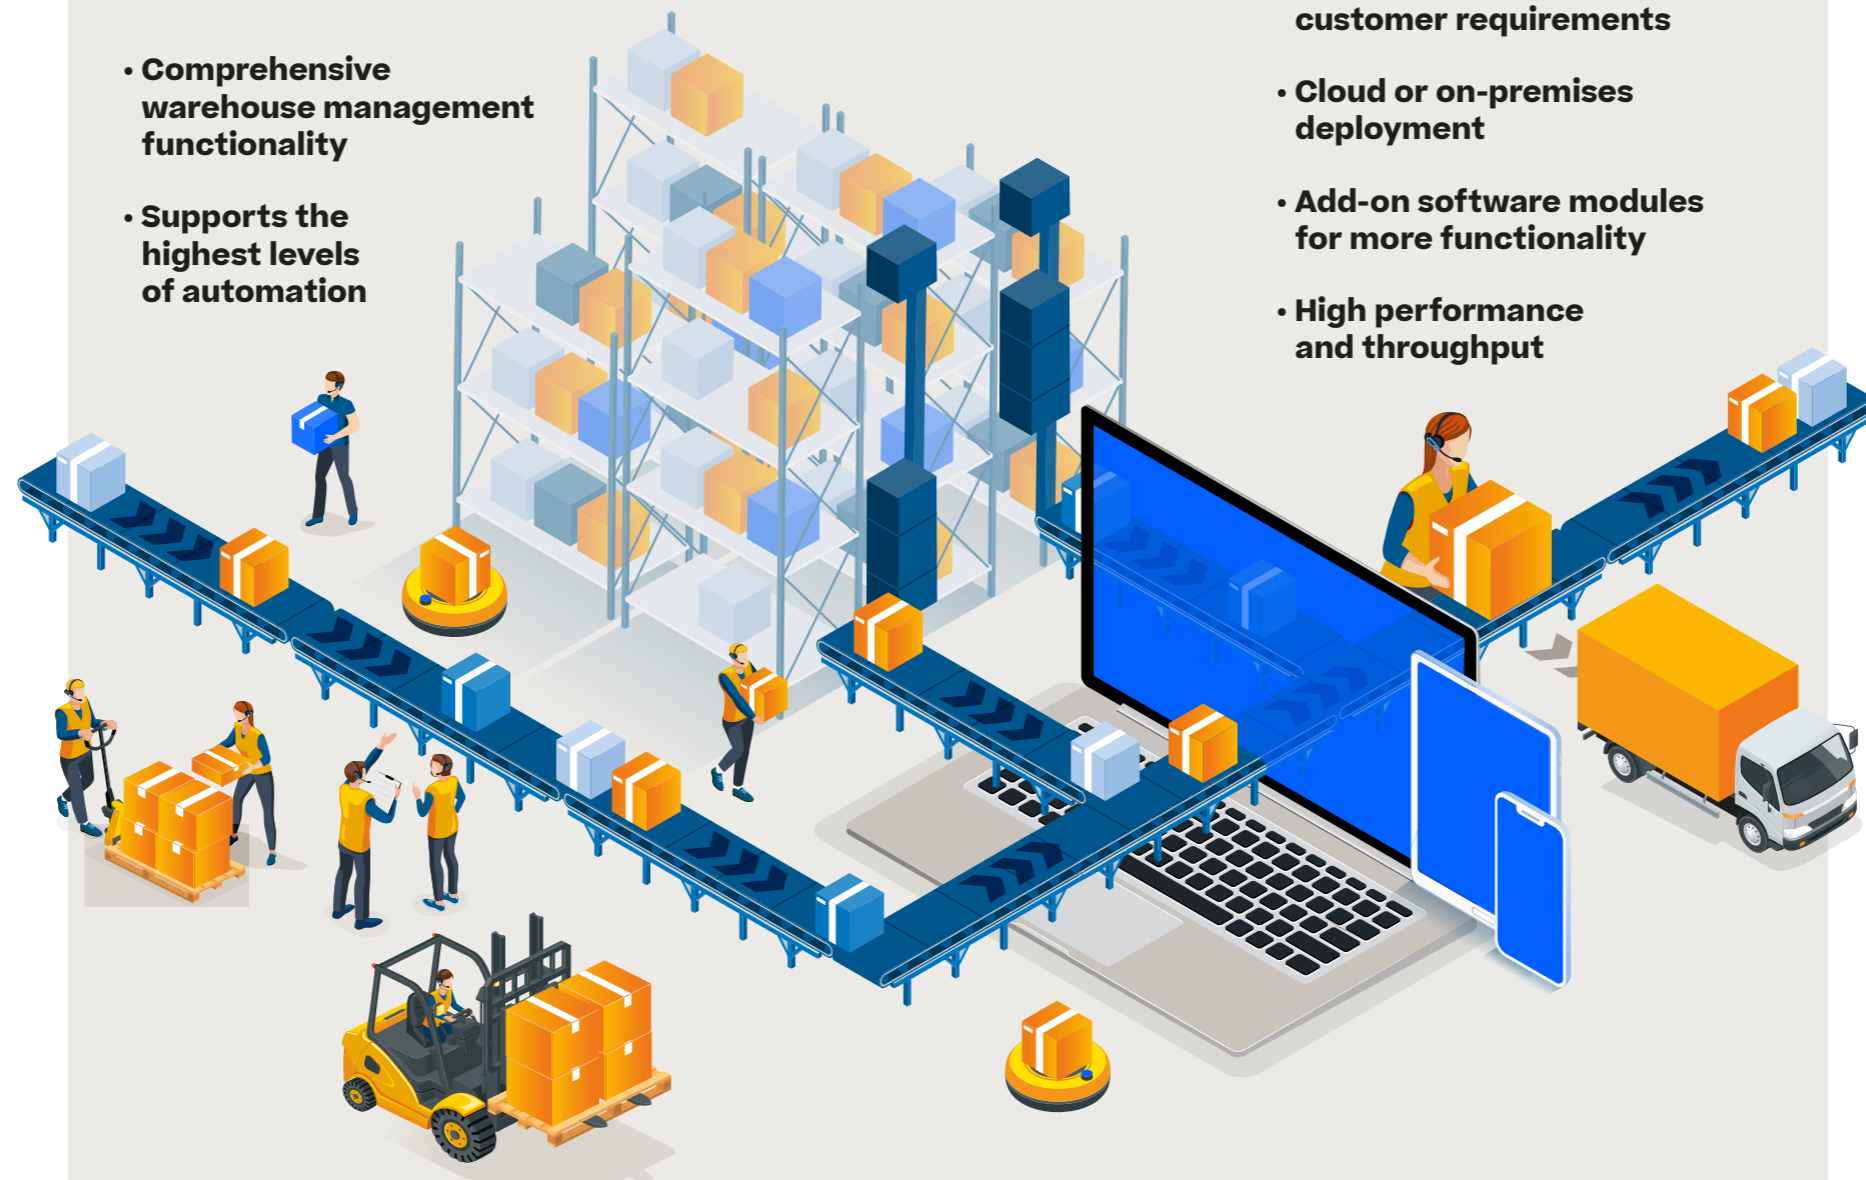

-  Demand for next- and same-day deliveries
-  Demand for 100% accuracy
-  Increasing product return rates
-  Increasingly complex regulations
-  Hiring and retaining skilled labor
-  Seasonal demand fluctuations
-  Rapidly changing market conditions
-  Complex inventories with multiple variants
-  Need for high throughput rates
-  Specialized business processes
-  Complex IT landscape

Körber Enterprise WMS

Key capabilities include:

- **Comprehensive warehouse management functionality**
- **Supports the highest levels of automation**

- **Customizable to meet customer requirements**
- **Cloud or on-premises deployment**
- **Add-on software modules for more functionality**
- **High performance and throughput**

Core benefits

-  Flexible, future-proof technology platform, tailored to meet demand
-  Complete digitization means more data to improve visibility, accuracy and planning
-  Adaptable software and add-ons optimize processes and productivity
-  ERP, TMS and YMS integration optimizes end-to-end processes
