Prophesy Mileage & Routing, a Körber product

Mileage and route generation that will simplify fuel tax reporting, expedite rate quotation, and ensure on time delivery.

Prophesy Mileage & Routing is the easy to use commercial-grade mileage and routing system you will have up and running in less than five minutes. You'll immediately find yourself using it to automate complex tasks such as looking up mileage and quoting rates over the phone, optimizing multiple stop trips, and routing between cities, intersections, truck stops, and zip codes.
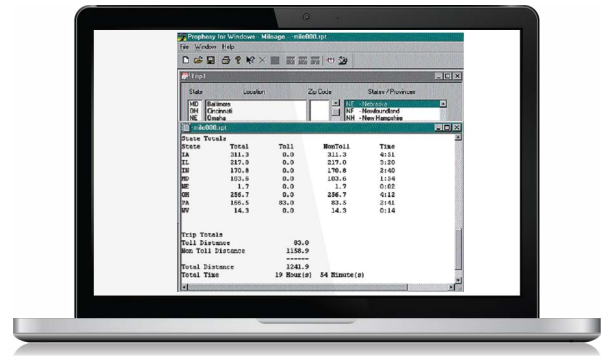

Prophesy offers a comprehensive system that can route to more than 1,000,000 points in North America, and can calculate both industry standard rating and practical miles. The program also integrates with our dispatch and accounting, fuel tax reporting, log auditing and fuel purchase optimization applications.

Mileage and routing features

- Contains more than 1,000,000 North American routing points
- Offers both industry standard rating and most practical mileage
- Integrates with our dispatch and accounting, fuel tax reporting, log auditing, fuel purchase optimization, load building, freight rating, shipment consolidation, and third party logistics applications
- Prophesy continually updates our cartographic database to ensure accuracy
- Provides bridge height and low underpass information as well as commercial vehicle restrictions for all roads
- Toll road avoidance feature lets you avoid frequent tolls
- Seasonal road closure feature, ensures proper routing during the winter months
KÖRBER

- Calculates accurate driving times and ETAs between points based on actual posted speed limits
- Will route to and from cities, intersections, zip codes, latitude/longitude points, postal facilities and more than 7,000 truck stops
- Allows entry of user-defined locations for easy look-up
- Route optimization automatically re-sequences points for shortest trip time or distance on multi-stop trips
- Provides mileage summaries by state (a great tool for fuel tax reporting)
- Offers full-color detailed mapping with the capability to zoom to one sq. mile
- Optional street-level version offers detailed street level mileage and routing and mapping

Mileage & Routing Will:

- **Generate the most efficient route, complete with detailed driving instructions in seconds!**
- **Account for bridge heights, low underpass and commercial vehicle restrictions, seasonal road closures, toll road avoidance and speed limits.**
- **Allow unlimited mileage look-ups without any transaction fees!**
- **Provide you with detailed full-color mapping, including optional street-level detail.**
- **Integrate with most popular dispatch software systems, including Prophesy Dispatch & Accounting, the fastest selling software in the industry!**
